

The Geberit Sigma 12cm Concealed Cistern is specifically designed for easy installation in part-height or room-height prewalls or partition walls. With a construction height of 108cm, it pairs seamlessly with back-to-wall floor-standing toilet pans. Notable features include adjustable flush volume settings (6-liter and 3-liter flush or 4.5-liter and 3-liter flush), condensation insulation, flexible water supply connection options (rear or top center), seawater resistance, a protective cover box for the service opening, immediate post-flush capability, and compatibility with filter systems for rainwater use.
